ITEMS INCLUDED WITH QUESTION PAPER

● A separate Data Book.

INSTRUCTIONS

● Answer ALL questions.
● Answer the questions in the spaces provided in this Question Paper or in the Data Book – THERE MAY BE MORE SPACE THAN YOU NEED.

INFORMATION

● The total mark for this paper is 90.
● The marks for EACH question are shown in brackets – USE THIS AS A GUIDE AS TO HOW MUCH TIME TO SPEND ON EACH QUESTION.

ADVICE

- **Read each question carefully before you start to answer it.**

- **Try to answer every question.**

- **Check your answers if you have time at the end.**

ANSWER ALL QUESTIONS.
WRITE YOUR ANSWERS IN THE SPACES PROVIDED.

1. Jacky is a student living in shared accommodation with other students.

    The student accommodation has access to a shared network with internet access.

    The students use both wired and wireless connections to the network.

    (a) Identify TWO benefits of using a wired connection rather than a wireless connection to a shared network.
    (2 marks)

(TOTAL FOR QUESTION 1 = 24 MARKS)

2. Miguel owns a company that produces software for primary school children. He works in an office with other programmers to do this.

They use PCs in the office and Miguel uses a laptop when visiting schools to demonstrate the software to the children.

Each device has:
- a graphical user interface (GUI)
- an optional command line interface (CLI)
- a single – user multi – tasking operating system (OS)
- a hard disk drive (HDD).

(continued on the next page)

2. continued.

   (a) Explain the purpose of a user interface.

(TOTAL FOR QUESTION 2 = 20 MARKS)

Turn over

3.   SchFurn sells furniture to schools throughout the UK.

A manager and two administrative staff work in the company office and three sales staff work remotely.

Staff in the company office use PCs for administrative tasks.

Sales staff use laptops when they visit clients to show a range of furniture available and to collect order details.

SchFurn wants a system that will provide:
- wireless connection for three PCs
- a file server
- an email server
- secure remote wireless access for laptops.

3. continued.

   (a) On the blank space provided for Question 3 (a) in the separate Data Book, draw a diagram to show the setup of the system.

   The diagram should include:
   - the devices used by the system
   - the connections between the devices
   - annotations including the devices and the types of connection.

   (6 marks)

3. continued.

(b) Glenda is a member of the sales staff. She works remotely from home using a laptop provided by SchFurn.

(i) Every week the sales staff and the office manager hold a meeting using voice over internet protocol (VoIP).

Codecs are used as part of VoIP.

Describe the use of codecs when using VoIP.

4. **JKH Bank has several high street branches and provides customers with an online banking service.**

   Jason, a customer, accesses the online banking service via a portable device.

   He has an up-to-date virus checker to protect his data from viruses and other malware when using the online banking service.

   (continued on the next page)

4. continued.

(a) Discuss threats to Jason's data when he uses a portable device for online banking.

You should consider:
- threats other than virus and malware attacks
- steps that can be taken to reduce the threats.
